

KEY TO

PAU SEP-A
YEAR 2011

PART A

I. Answer the questions

1. Because global warming can move very big quantities of materials around on the surface of our planet.
2. Rising sea levels, which affect the distribution of large amounts of water, release and increase pressures through the ground. In this respect, heavy rain could also be linked to seismic activity.

II. True or False

1. F par. 2, lines 2-3 "... *it is possible to speculate the climate change might make some events more likely. If we ..., then we might see some impacts.*"
2. T 3, 2-3 "*Melting glaciers and rising sea levels ... increase pressures through the ground.*"
3. T 4, 1-3 "*Studies point towards increased risk in relation to a warmer world, and observations suggest that the rise in global temperatures may already be producing disasters in the earth's surface.*"

III. Find a word or phrase

1. probable - *likely*
2. increase - *rise*
3. connection - *link*
4. far away - *distant*

IV. Choose a, b, or c

1. b 1, 2-3
2. c 3, 1-2
3. c 3, 4-6

In all questions except III - which is a vocabulary exercise - please supply evidence that supports your answer, by indicating the line number(s) and by writing down the relevant part of the text. Thank you.

PART B

Choose one of the topics and write about 10 to twelve sentences. Send your piece of writing to me as a private message from within maxi80.tk or write it down in your notebook. I strongly recommend that you make use of the KSR.ELT network(s). Thanks.
