

KEY TO

PAU **SEP-B**
YEAR **2011**

PART A

I. Answer the questions

1. They had thought back in 2005 that the figures could not possibly increase.
2. Mobile technology got more sophisticated, making media more accessible to teenagers' pockets and beds.

II. True or False

1. F par. 1, lines 1-2 "... (They) ... spend ... *practically* every waking minute - *except the time in school* - ..."
2. T 3, 1-2 "... *they pack on average nearly 11 hours of media content into that seven and a half hours.*"

A tricky one... Teenagers with multitasking abilities may pack up to 11 hours into their regular 7 ½ hours. This does not mean at all that they actually spend up to 11 hours... It should be **T** rather than **F**, in my humble opinion if multitasking means that it **would make** time amount up to 11 hours. False also correct if the relevant part the student highlights is the one *in red* above. - **Rafa.**

3. T 4, 3 "*It found, moreover, that heavy media use is associated with behavior problems and lower grades.*"

III. Find a word or phrase

1. suspicions - *fears*
2. compress - *pack*
3. results - *findings*
4. attached - *tethered*

IV. Choose a, b, or c

1. a [THEY ARE AWAKE, THEY ARE ONLINE.]
2. c Another tricky one...
3. c

In all questions except III - which is a vocabulary exercise - please supply evidence that supports your answer, by indicating the line number(s) and by writing down the relevant part of the text. Thank you.

PART B

Write about 10 to twelve sentences. Send your piece of writing to me as a private message from within maxi80.tk or write it down in your notebook. I strongly recommend that you make use of the KSR.ELT network(s). Thanks.
